

# **2012 Mobile User Survey**

Mobile User Preferences, Habits, and Expectations

**Keynote Competitive Research** 

leader in Internet and mobile cloud monitoring

### Methodology

- Keynote Competitive Research, Keynote's Industry Analysis group, conducted a survey of 25-50 questions focused on mobile user habits and preferences designed to understand usage patterns and expectations.
- The survey included 5,388 panelists from the Keynote Research Panel
  - 3,145 were smartphone users
  - 1,976 were tablet users
- Survey conducted 1H of 2012

### **Key Insights on Mobile Device Usage**

#### **Smartphone Usage**

- Android was the most popular operating system at 43%, followed by iOS at 37%
- 57% of users reported using a 3G service, with only 27% using 4G
- The top three activities performed on a smartphone were accessing local information (88%), searching for information (82%), and participating in social media/networking sites (76%)
- Smartphone users *preferred* to use *mobile apps* over mobile websites for map information, social media updates, e-mail, and banking information
- Users preferred mobile websites for news, food/entertainment info, travel info, shopping info, and shopping
- Two-thirds of smartphone users (64%) want a site to load in less than 4 seconds
- "Web page slow to load" top mobile frustration

### **Key Insights**

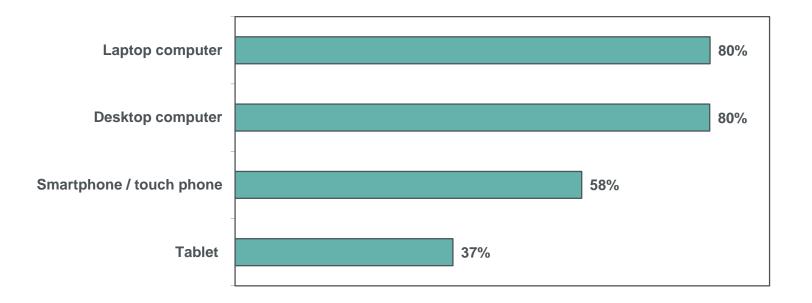

#### **Tablet Usage**

- Apple was the most common tablet brand at 53%, followed by the Amazon at 20% and Hewlett-Packard at 7%
- iOS beat out Android operating systems for tablets (43% to 35%)
- 77% of tablet users reported using Wi-Fi, versus 12% for 3G and 7% for 4G
- Top activities for tablets were to read news and entertainment, search for information, and watch videos
- Tablet users were mostly indifferent about choosing a mobile app or mobile website for their various activities
- 6 of 10 tablet users want a sub-three second download
- "Web page slow to load" top frustration
